

30<sup>th</sup> September 2021

Dear BDA Member

### Changes to wording

We recently sent you an invitation to our forthcoming AGM Event on 16<sup>th</sup> October 2021 at Waltham Place.

We included a resolution to modify the Objectives of the Association to incorporate research as a key element of the BDA's activity. We have received feedback about this proposal which was discussed in the September trustees meeting. We revised the resolution as below. This achieves the desired result with the minimum amount of changes to the original text. In this case keeping things simple is a good course of action.

The below revised proposal will be put to the vote at the AGM.

Yours sincerely

Gabriel Kaye  
Executive Director

### Revised Proposal to add the Object of 'Research' to the Constitution of the BDA

The current object of the CIO (Charitable Incorporated Organisation) is to develop, promote and disseminate knowledge of the biodynamic methods inaugurated by Dr Rudolf Steiner for the betterment of farming, forestry and gardening.

The revised proposal is to insert a strategic research function into the Constitution of the BDA, as follows:

The object of the CIO (Charitable Incorporated Organisation) is to **research and** develop, promote and disseminate knowledge of the biodynamic methods inaugurated by Dr Rudolf Steiner for the betterment of farming, forestry and gardening.
